## REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The prior art does not show or fairly suggest the claimed invention of a method of producing an electrochromic device and the electrochromic device produced by said method having the claimed structure and claimed limitations, wherein a rejection under 35 USC 102 or 103 would be improper. Please particularly note the combination of claimed elements and claimed limitations, including the reasons for allowance given in the office action mailed on 6-28-06, which stated:

The prior art fails to teach or fairly suggest the claimed invention of a method for producing an electrochromic device, wherein the substrate is predeposited with a barrier layer and an electron conducting layer. Clearly this is an economical way in providing the necessary layers for the claimed invention.

Therefore, in light of the Applicants' arguments and/or amendments, the claimed invention is considered to be in condition for allowance as being novel and nonobvious over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
